Buyers fuel continued growth in Greater Vancouver housing market

Vancouver, B.C. October 2, 2007 – The Real Estate Board of Greater Vancouver (REBGV) reports that total residential sales of detached, attached and apartment properties reached 2,776 units in September 2007, an increase of 10.2 per cent compared to 2,519 sales in September 2006.

The inventory of residential properties listed for sale remains stable, with an overall year-to-date increase of 4.1 per cent to 45,054 residential units listed between January and September 2007, from 43,264 for the same period in 2006. The number of new listings increased 8.2 per cent to 4770 in September from 4408 in August of this year.

“There is no single demographic of buyers. They include first-time buyers, people choosing to take advantage of current home equity to ‘move up’ in the market, as well as people coming into Greater Vancouver from other areas. Our data indicates that the majority are purchasing a principal residence,” says REBGV president Brian Naphtali.

“There’s a great deal of choice in the market for a range of consumers today,” explains Naphtali. “While 45 per cent of homes for sale are priced at below \$500,000, there are also a significant number - 37 per cent - listed in the \$500,000 to \$1-million range. Of the active listing inventory of more than 11,000 residential properties, approximately 18 per cent are priced above \$1-million.”

According to Multiple Listings Service® (MLS®) data, sales of apartment properties increased by 7.7 per cent to 1,177 sales in September 2007 compared to 1,093 sales in September 2006. The benchmark price of an apartment property in Greater Vancouver, calculated by the MLSLink® Housing Price Index, is \$371,718 up 11.1 per cent from one year ago.

Sales of attached properties increased by 27.6 per cent in September 2007 to 500 sales, compared to 392 sales in September 2006. The benchmark price of an attached unit is \$452,944, up 10 per cent from a year ago.

Sales of detached properties increased by 6.3 per cent in September 2007 to 1,099 sales, compared to 1,034 sales in September 2006. The benchmark price of a detached unit is \$737,927 up 11.9 per cent from last year.

HOW TO READ THE TABLE:

BENCHMARK PRICE: Estimated sale price of a benchmark property. Benchmarks represent a typical property within each market.

PRICE RANGE: Expressed as a + or - percentage of the benchmark price, there is a 90% probability the sale price of a benchmark house is within the interval.

PRICE INDEX: Index numbers estimate the percentage change in price on typical and constant quality properties over time. All figures are based on past sales.

In Year 2001, the indexes are averaged to 100
